the problem of good conduct both in practice and in ethical theory ought to receive some clarification one would suppose from a science that studies the mind and the will in their actual operation if in the past psychology has not materially contributed to this problem it is possibly owing to the incompetence of psychology to tell us much that is either true or

useful about the essential nature of mind or will or of the soul i believe that such has been the case and that now for the first time and largely owing to the insight of dr sigmund freud a view of the will has been gained which can be of real service to ethics in presenting this i shall disregard the current comments on freud which have become so familiar for he deserves neither the furious dispraise nor the frantic worship which have been accorded him he is a man of genius simply more sagacious and more perspicacious than his detractors and far more sane than many of his followers freud s contribution to science is notable and in my opinion epoch making for a reason which has hardly ever been mentioned and this reason is that he has given to the science of mind a causal category or to put it less academically he has given us a key to the explanation of mind this key to the mind which freud calls the wish is the subject of the present volume and we shall consider more particularly the bearing which this wish psychology may have on ethics preface p v

the purpose of this book is to add to clinical medicine a further principle of research from the completeness and the import of these early results i am sure that i have come upon very fruitful territory to me moreover it was an attractive task to see our benumbed and thwarted conceptions of disease completely dissolved to be able to observe human pathology in its making
